Direct your fleet efficiently this harvest season

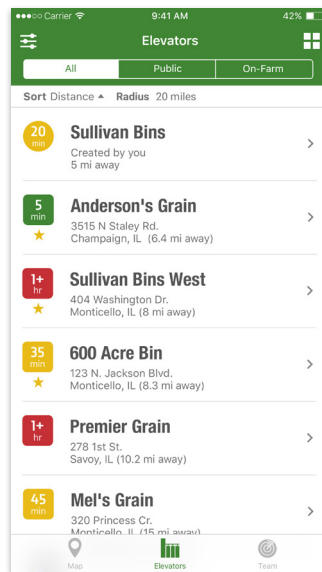

JOHN DEERE

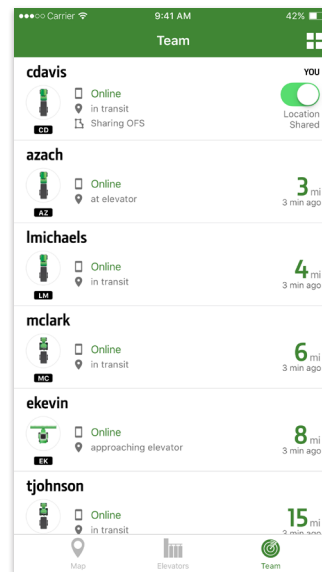

GrainTruckPlus helps you manage your grain harvesting fleet from your field to your preferred elevators. Know where your team members and the nearest elevators are located and get information about wait times at those elevators.

See and monitor your harvest operation

Know wait times at your local elevators

Create a team and know where they are

See your John Deere Operations Center field boundaries on the map

Frequently Asked Questions

How does GrainTruckPlus determine its elevator wait times?

GrainTruckPlus uses location information from registered users who are visiting elevators to calculate the current wait time at each elevator. That information is displayed along with the number of registered GrainTruckPlus users at the elevator.

Do I have to be connected to the internet to use GrainTruckPlus?

Yes, you do need a constant internet connection on your mobile device to use GrainTruckPlus. This connection can be either mobile data or wifi.

What level of hardware and software do I need in order to use GrainTruckPlus?

For iOS, we require an iPhone 4s or newer and iOS 9 or newer. For Android, we have developed GrainTruckPlus to run on a wide variety of high and low spec smartphones. We require Android version 4.4.2 (KitKat) or newer.

What happens when I connect GrainTruckPlus to MyJohnDeere account?

You can import field boundaries from your John Deere Operations Center Organizations. As a team leader, you can then share field boundaries so everyone on your team can see them. To stop sharing field boundaries, sign out of MyJohnDeere from the main menu.

Is there any cost to use the app?

No, there is currently no cost to use GrainTruckPlus.

Do I have to own John Deere equipment or have a MyJohnDeere account to use the app?

No, any person with a smartphone able to support the app can use GrainTruckPlus.

Which users can see my location, and which users cannot?

Users that are on your team will be able to see your location, other users who are not on your team cannot. If you want to stop sharing your location, you can tap the “stop sharing location” switch next to your GrainTruckPlus handle on the team page at any time.

How many teams can a user be on at one time?

A user may only be part of one team at a time.

What happens to the app if I get a new phone, but keep my same phone number?

When you go to the drivers page, you will have to enter your phone number, which will allow you to receive a code via text or phone call to enter into the app. After completing this step, you will have the same handle or username that you had on your previous phone.

A public elevator is not on the map. How do I request to add it?

On the map view, tap the options icon (three dots in the top-right corner). On the menu that appears, select “Report Missing Elevator” and complete the form that opens.

Can I add my on-farm storage as an elevator location on the map?

Yes, you can create your own secure on-farm elevators that will be shared only if you are the leader of a team. When sharing, the elevators will show wait times.
