

# SEEDERS AND CULTIPACKERS

Woods' seeders give you the flexibility to handle primary seeding, over-seeding, and can even plant up to three types of seed in one pass. You choose the combination of seed boxes that fits your application. That means efficient, one-pass planting that maximizes efficiency and productivity.

Woods cultipackers are a high quality seed bed tool backed by our reputation for durability and reliability. Choose this rugged, easy-to-use implement to crush dirt clods and eliminate air pockets prior to planting. After broadcast-seeding, use the cultipacker to lightly firm the soil around seeds.

# FOOD PLOT SEEDERS

Plant up to three types of seed in one pass. Ideal for hunters and small acreage farmers seeding legumes and larger seeds.

- Three seed box choices — one cool season and two legume — can plant a variety of seeds like alfalfa, clover, corn, sorghum, soybeans, turnips and wheat.
- A trailing cultipacker firms the seed bed for perfect seed-to-soil contact that's ready to trap moisture for germination.
- Plant cool season seeds, in rows, at a deeper depth while evenly broadcasting up to two types of legume seeds at a shallow depth — all in one pass.

The Precision Super Seeder gives you the flexibility to handle primary seeding, over-seeding, and applications such as native grasses and food plots. It's the most versatile seed box combination on the market.

- Three seed box options — cool season, warm season, and legume — let you plant anything from rye and oats to prairie grasses, wild flowers, radishes and soybeans.
- Efficient, one-pass planting of up to two seed types at one depth and legume seeds at a different depth — with models equipped with three seed boxes.
- All seed boxes can be engaged and disengaged independently with a single lynch pin — no tools required.
